KEYWORD INDEX

adaptation 21
aerobic deterioration 271
African savannas 233
agricultural policy 493
agroforestry 121
alfalfa 257
alfalfa (Medicago sativa L.) 195
alkaloids 221
animal constraint 227
animal production 535
annual *Medicago* 349
anti-nutritional effects 221
arid 429
associative BNF 371
assumptions 385
beef 3
behavior 99
biases 385
biodiversity 17, 233, 241, 281, 295
bioenergy 61
bloat 167
body size 39
Brachiaria 391, 517
breeding potential 21
by-pass protein 167
C3 grasses 181
C4 grasses 181
C4 plants 307
carbon dioxide 181
carrying capacity 333, 553
cattle 3, 227, 525, 545
Cerrados 391
characterization 31
chop length 271
clovers 141
cold 141
collaboration 493
collection 31
common property resource 553
community 333
community composition 181
competition 411
computers 441, 469
condensed tannin 153
conditioning 265,
conservation 31, 233, 295
constraint 39
consumption 545
coordinated resource management 289
core collection 21
crop improvement 141
cropping systems 241, 341
culture 99
cyanogenic glycosides 221
dairy 3
decision support 469
decision-making 479
defoliation 403
development 545
diet selection 525
digestibility 323
digestive constraints 109
disturbed land reclamation 299
drought 141
drought resistance 129
dry tropics 129
E-mail 441
ecological restoration 299
ecology 21, 289
economics 61, 121
ecosystem conservation 385
ecosystem management 493
ecosystems 479
elevated CO2 189
ensilage period 271
environment 281, 357, 455
environmental policy 493
environmental stress 141, 411
erosion 241
establishment 349
evolution 99
exploitation 385
extension 445
farming systems 341
farmyard manure 281
feeding value 271
fertilisers 204, 461
fertilizer application 195
fertilizer recommendations 195
fiber 323
fire 385
flavonoids 221
fodder 429
fodder shrub 129
fodder trees 31, 129
forage 3, 341, 61
forage grasses 21, 79
forage legumes 21, 79, 455
forage quality 45, 181, 265
forage species 45
foraging behaviour 39
foraging strategy 109
fungi 265
genetic engineering 167
genetic gain 71
genetic markers 21
genetic resources 31, 71
genetic variation 299, 323
genetics 167
germplasm adaptation 517
Global Information Systems 441
global climate change 189, 251
goats 525
grass silage 271
grass species 55
grasses 3, 31, 141, 403
grasslands 189, 545
grazing 39, 333, 479
grazing management 385
grazing methods 227
grazing resource 553
grazing scheme 445
grazing systems 469, 525
grazing tolerance 411

green matter availability 391
greenhouse effect 189
Guizhou 499
harvest 517
harvesting system 271
hay 3, 265
heat 141
herbivore digestion 153
herbivory 385
heritability 323
heterogeneity 17, 109
heterosis 71
hierarchy 17
hydrology 479
in vitro culture 79
individual 99
information sources 195
information technology 479
information transfer 257
ingestive behaviour 109
ingestive constraints 109
inoculant 271
insect pests 257
intake 39, 45, 307
integration 341
interaction 121, 341
Internet 441
irrigation 461
knowledge 445
land use 289
legume BNF 371
legumes 3, 31, 281, 403, 411
ley farming 349
lignin 323
litter decomposition 371
livestock 121, 129, 429
manure 281
manure management 195
methane 189
microbial protein 307
mixed grazing 525
mixed species grazing 45
modelling 45, 469
models 341, 357
molecular markers 79
monitoring 479
multispecies animal production 233
N immobilization 371
net primary productivity 371
nitrogen 281, 461
nitrogen deposition 295
nitrous oxide 189
no-till 241
nomadism 333
non-equilibrium dynamics 419
non-protein amino acids 221
non-structural carbohydrate 307
non-wood 55
nutrient cycles 357
nutrient cycling 371
nutrient management 195
nutrients 204, 307
nutritive value 71
opportunistic management 419
organic matter 391
P-plant 391
P-soil 391
Panchayat 333
Panicum 391
paper making 55
parasites 227
participation 445
participatory resource management 553
Pastoralism 419
pasture 3, 121
pasture degradation 371
pasture management 535
pasture-livestock production system 499
pathology 251
perennial Medicago 349
persistence 349, 403
pest management 257
Phalaris arundinacea 55
physics 99
physiological disruption 257
plant analysis 195
plant characteristics 455
plant regeneration 79
plantation tree 129
policy 289, 545
pollination 455
polygenic 251
potato leafhopper 257
power 445
preservative 265
primary production 181
proanthocyanidins 153, 167
production 545
productivity 333
propagation 299
protein 323
proteolysis 271
pulp 55
pulp properties 55
qualitative resistance 251
quantitative resistance 251
race-specific 251
range degradation 419
rangelands 295
rationale 61
reed canary grass 55
rehabilitation 295
resource inputs 357
restoration 295
rotation 241, 349
rumen fermentation 307
rumen protein degradability 307
ruminant 39, 153
ruminant nutrition 323
ryegrass 461
salinisation 251
saponins 221
seed marketing 505
seed production 455, 505, 517
seed quality 505
seed transfer guidelines 299
selection 71, 323
self-organization 99
semi-arid 429
shade tolerance 129

sheep 525
shrubs 429
silvipasture 333
slurry 281
social forestry 553
soil 357
soil carbon 181
soil conservation 61
soil quality 241
soil testing 195
somaclonal variation 79
somatic hybrids 79
South China 499
spatial pattern 17
species diversity 17
stand persistence 257
stocking method 535
stocking rate 45, 227, 281, 535
stress tolerance 71
Stylosanthes 517
sustainability 121, 461
sustainable 241
sustainable agriculture 499
taungya system 129
technology package 553
technology transfer 445, 461
terpenoids 221
three strata forage system 129
top feed 553
toxicity 221
transgenic plants 79
trees 121, 429
trends 545
tropical forages 31, 204, 505
tropical grasses 505
tropical Latin America 545
tropical legumes 505
tropical pastures 45, 371
UV-B 251
waste management 357
water stress 403
watershed planning 493
wet tropics 129
white clover 281
winter hardiness 403
winter kill 403
worms 227
